

Hardware and DIY Tools Top the List of UK Wholesale Buying Leads

The buying leads posted at Wholesale Pages at the beginning of year 2012 revealed an increase in the rate of queries for hardware and DIY tools. Since these leads are a projected image of upcoming retail trends of the UK market, experts believe that gadgets and DIY tools will remain a hot retail product for summer 2012.

The leads section at Wholesale Pages not only helps buyers and suppliers make potential business contacts but also offers an insight into the current and upcoming retail as well as wholesale trends. Stephan Royce, the assistant manager Business Development Department at Wholesale Pages, believes that UK wholesale suppliers are the ones with the deepest observation about the current and upcoming market trends so checking on what they are looking for to buy and sell is an authentic way to learn about the UK market.

Among the most wanted wholesale supplies posted in the Leads section, wholesale designer clothing UK, electronics, mobile phone and accessories, consoles and video games and baby good are some of the many. The demand for DIY and Hardware tools has however been raised recently.

According to Royce, Wholesale Pages (<http://www.wholesalepages.co.uk/>) plans to promote the suppliers of these items so that the buyers and sellers can benefit from the portal's services accordingly. When asked on how the portal plans to do it, Royce said, "I cannot break anything right now but the members of Wholesale Pages will soon learn the latest wholesale and retail trends through our bimonthly updates."

Other than that, Wholesale Pages pledges to go one step ahead of the rest by getting special discounts for members on the most wanted UK wholesale products. These special offers and discounts are much popular among the trade clients registered at Wholesale Pages and the suppliers are also keen to make their products become part of this hot section. Since Wholesale Pages is no ordinary directory, it also gives its members a great opportunity to learn about the UK wholesale market through its learning centre.

About Wholesale Pages

Wholesale Pages has been serving the UK wholesale industry from the past many years. The portal enjoys a unique position among other B2B directories by keeping a detailed account of UK manufactures, distributors, drop shippers, importers and of course wholesalers.
