VERSATILE SPACES FOR MULTIFUNCTIONAL LIVING

In recent times we have seen the kitchen become a more multi-functional living space, and as a result, the design and layout in new build properties must work harder than ever before.

There is greater importance being placed on clever internal storage and solutions for extra cupboard space such as high wall units and kitchen islands, or breakfast bar areas that can also double up as an alternative desk space.

COLOUR CONFIDENT

Dark Blue shades continue to be popular for 2022, so we have built upon the success of our 2021 Indigo Blue and added it to a number of our new ranges.

Softer wood shades juxtaposed against subtle neutrals are perfectly suited for creating minimalist, yet warm and calming spaces.

EMOTIONAL WOOD

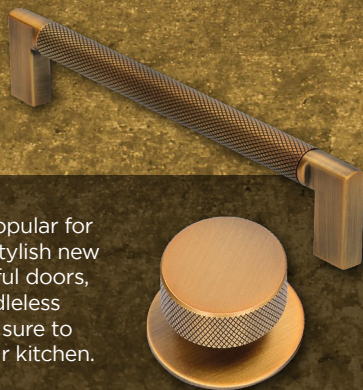

TIMELESS CLASSIC KITCHENS

Painted shaker-style cabinetry that pays homage to the opulent designs of traditional English kitchens continues to be very popular. Pair these stylish tones with warm metal hardware for a timeless finish..

WARM METALS

Warm metals continue to be popular for 2022. Whether it's one of our stylish new handles paired with our beautiful doors, or a trim that sits with our handleless collection, this popular finish is sure to add a touch of elegance to your kitchen.
