

DECORATING - Wickes 'My Project' Facebook app

Author: The Style PA

Wickes have launched a new Facebook app for people to share their DIY triumphs and tips. It's called My Project and you can track your progress with photos and captions and then share with family, friends and other app users. It's a way to find a little 'real life' inspiration for your home improvement projects.

Wickes asked me to get involved and I uploaded a recent project my parents had undertaken using Wickes products (I'm practically my parents' interior designer anyway). The kitchen in their new house had not been modernised for a LONG time. Needless to say, it needed some attention, but without having to spend a fortune. Here are the pics... (next up we are tackling the bathroom!)

BEFORE... I'm pretty sure no one had touched this kitchen for some time.

DURING... the kitchen was a take-away kitchen from Wickes. We opted for the Stamford, which is really great value but still good quality. We went for a darker worktop for a bit of a contrast.

AFTER... the finished result. What do you think? I love the neutrals, simple design and the fact it's bright and light.
