

DASH
SHELTERS

Modular Weather Shelters

Preparing your stores for the peak sales period

DALE
Office Interiors

- Free-standing, modular system
- Simple installation and maintenance, unlike tech-based queuing systems
- No planning required
- One-off cost

Designed to enhance the customer experience by providing additional shelter during wet weather conditions whilst promoting and maintaining social distancing.

Features & Benefits:

- Provides shelter for customers – enhances the shopping experience whilst maintaining social distancing and protecting customers whilst queuing to access your store. Means customers can attend your store even during wet weather.
- Freestanding - no need to fix to buildings or other surfaces meaning no specialist installation required and no remedial works needed when removed.
- Modular in 2m bays – Start with a 2m 'starter bay' and add on with 2m 'add on bays' which can be added to any length required in multiples of 2m.
- 2m bay length – promotes social distancing with 1 person per bay.
- Open sided – allows air movement whilst providing overhead shelter.
- Supplied flatpack – pallet delivery meaning reduced transport costs.
- Temporary shelter – no need for planning permission (checks to be undertaken by local authorities, may be subject to location)

Simple construction and no need for planning permission

Construction:

- Built using a Zinc powder coated steel frame, concrete foot blocks and a solid roofing sheet.
- 2nr concrete weight per leg at 24kg each totalling 48kg
- Max run of five modules including one starter bay and four add on bays
- Durable plastic roof panel
- Modular bolt together bays

Advertise

Promote to a captive audience

With collaborative supplier opportunities possible, you can promote key messages to a captive audience as they queue to enter your premises.

We can offer you advertising solutions that help you to create modular Point Of Sale displays.

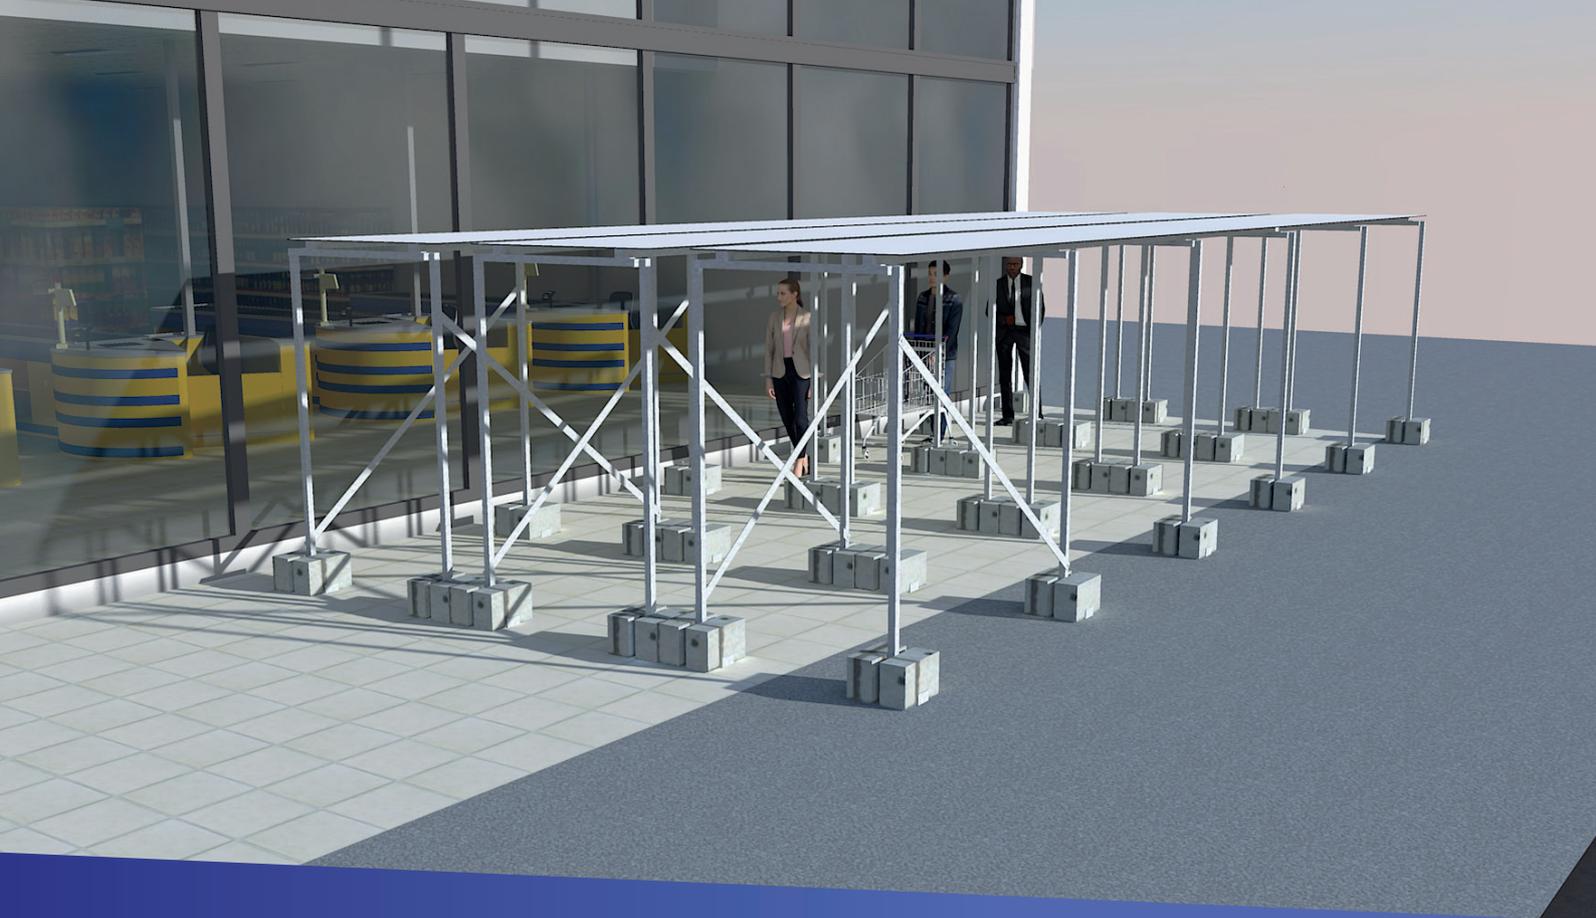

These can be external mesh windproof banners or various internal signage.

Advisory note

We can install sides to the shelter but we advise that any banner sides are removed outside of working hours.

We also advise that banner sides be removed in abnormal winds in excess of 19 miles per hour.

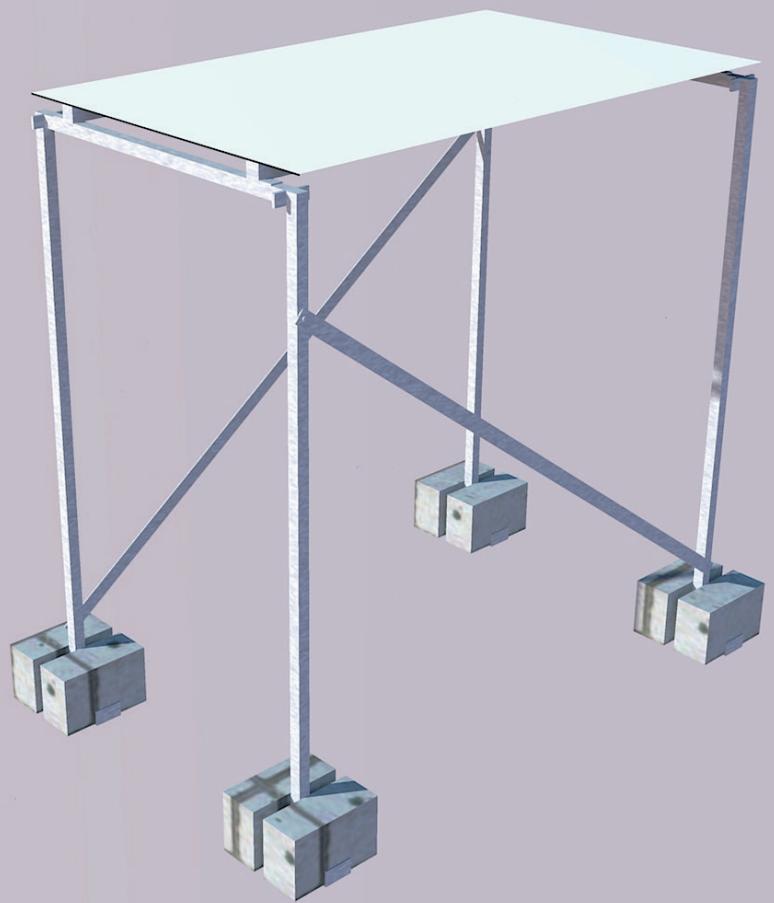

Adaptable & Modular System

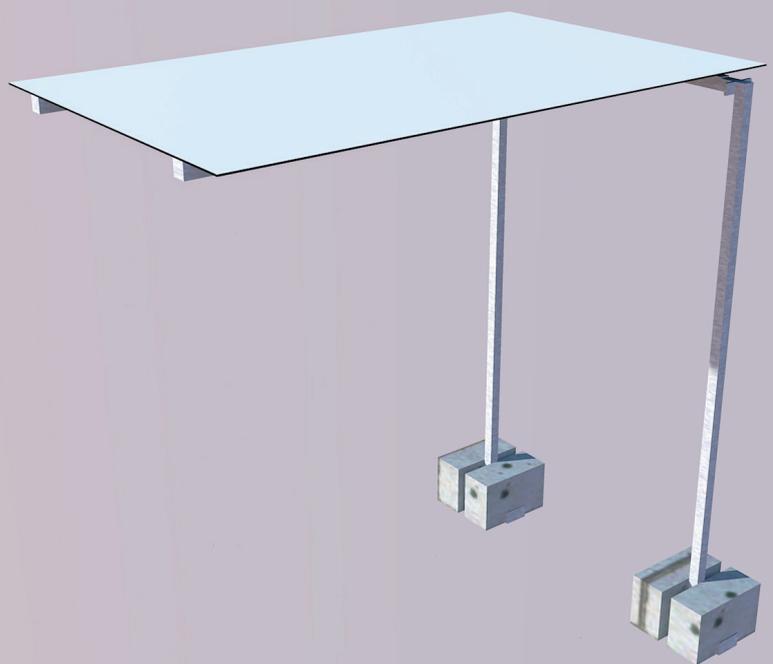

Our Dash system can be configured to meet your needs.

Starter Bay

Add-on Bay
